

SNC1D
CHAPTER 3: BIODIVERSITY

3.3: THREATS TO BIODIVERSITY

Section 3.3 Review

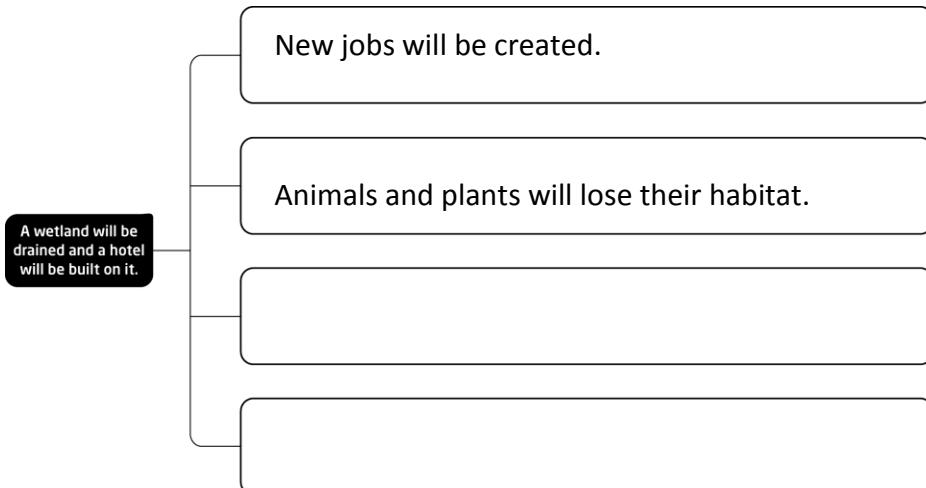

BLM 3-3

1. A) Define the term habitat loss.

- B) List 3 human activities that can cause habitat loss.

- C) Name 4 natural sources of habitat destruction.

2. Complete this cause and effect map.

The new hotel _____ (is/is not) a good idea because _____

3. Cutting down too many trees in a forest can threaten, or hurt, biodiversity because _____

4. Define an **alien species**, an **invasive species**, and a **native species**.

5. Invasive species come from one ecosystem and move to or brought to another ecosystem. Some invasive species hurt the ecosystem; some do not. Complete this T-chart.

We should eliminate all invasive species because...	We should allow some invasive species to stay because...

Give 3 reasons why alien species do well when they are released in a new part of the world.

6. Define the term **overexploitation**. What affect does overexploitation have on a population? Provide an example.

6. Complete the Venn diagram.

Use these words or your own.

Species die

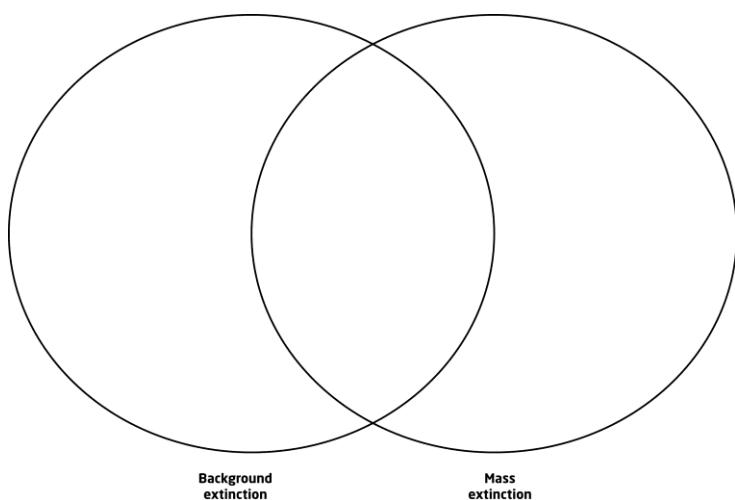

Happens slowly over a long time

Happens all at once

Dinosaurs died out

Caused by sudden change

Caused by slow change

7. Mass extinctions are probably caused by _____

8. The biodiversity crisis is _____

9. Name 3 human activities that can hurt biodiversity.
